

Adobe Experience Manager

# AEM AI Assistant

## Hands-On Lab Guide

This lab guide walks you through 8 hands-on exercises to explore AEM's AI Assistant capabilities — from brand governance and content editing to social media optimization and AI content visibility.

---

## Setup

### Step 1 — Create Your Playground

Open the AEM Playground link and register with your email address:

- <https://aem.now/>
- <https://www.aem.live/developer/aem-playground>

# Explore new AI workflows in AEM

Please fill in this field.

Discover what's possible and experiment with new AI capabilities in a safe test environment. Generate content, optimize sites, and more with streamlined automations and new workflows made for speed and simplicity.

Here are your access details for the 30-day AEM Playground you requested. This is a secure, isolated environment designed to let you explore the latest agentic Adobe Experience Manager capabilities without impacting any of your existing systems.

Here are your access details:

- **Experience Manager:** <https://experience.adobe.com/#/@aemsitestrial/experiencemanager/>
- **Direct author access:** <https://author-p153710-e1614654.adobe.aemcloud.com>
- **Site Preview URL:** <https://main--creativerhino05647--aemsitestrial.aem.page>
- **Site Live URL:** <https://main--creativerhino05647--aemsitestrial.aem.live>

Resources

- [Learn more about AEM Agents](#)
- Watch the [getting started video](#)
- Follow the instructions in the Experience Production Agent [workbook](#)

Welcome email with playground links

## Step 2 — Configure the Workbook

1. Go to <https://experience.adobe.com/#/@aemsitestrial/experiencemanager/> and log in with the email used for registration.

Experience Cloud login

2. Verify you are logged in under the **AEM Sites Trial** organization — click the avatar in the upper corner.
3. Open **Sites** from the navigation.

*Sites navigation item*

4. The AEM Sites Administration UI will open. If a coachmark appears, check *Don't show this again* and click *Close*.

**?** Your live site URL is `https://main--{siteName}--aemstestrial.aem.live` — the exact URL is in your welcome email under the Site Live URL section.

### Step 3 — Validate Brand Guidelines

5. Navigate to <https://experience.adobe.com/#/@aemstestrial/experiencemanager/> and click **Governance Context**.

*Navigating to Governance Context*

6. Browse the Fréscopa Coffee brand to review configured guidelines.

→ ↻ https://experience.adobe.com/#/@aemsitestrial/experiencemanager/governance-context/brands/frescopa

- Domains

### Text Checks

#### Sophisticated Voice

On core brand and product communications (e.g., homepage, product pages, brand story, campaign pages), the tone should feel at least somewhat sensory, warm, or inviting. Ideal language evokes taste, aroma, and emotion, and uses confident, conversational phrasing. However, it is NOT required that every sentence be poetic or richly metaphorical. Consider this check PASSED if there are clear signs of care in wording (e.g., appealing descriptions of coffee, atmosphere, or experience) and the overall tone is premium. Only mark this check as FAILED when a major brand-facing page is consistently flat, cold, overly technical, or generic in a way that weakens the brand experience, and there are no noticeable attempts at sensory or emotional language. For transactional, legal, or purely technical copy (e.g., system messages, cookie notices), neutral language is acceptable and this check may be treated as NOT APPLICABLE.

Active Created: Feb 18, 2026 Updated: Feb 19, 2026 Source: Manual

#### Naming & Lexicon

For coffee products, blends, and branded experiences, aim to use at least some evocative or memorable names (e.g., 'Morning Muse', 'Midnight Oil') and sensory, specific descriptions where it makes sense (aroma, taste, mouthfeel, origin, ritual). Functional names are acceptable for core equipment, categories, or utilities. Consider this check PASSED if: (a) there is at least some evocative naming OR sensory description used in customer-facing areas, and (b) technical or corporate jargon does not dominate the overall impression. Only mark this check as FAILED if customer-facing naming and descriptions are dominated by generic terms or heavy technical/corporate jargon, with no real attempt at a distinctive or sensory lexicon. For purely technical or infrastructure-related surfaces (e.g., TLS error pages, routing diagnostics, developer tools), technical terminology is acceptable and the check can be marked as NOT APPLICABLE.

Active Created: Feb 18, 2026 Updated: Feb 19, 2026 Source: Manual

#### No Shouty All-Caps CTAs for Premium brands

Customer-facing text (especially headlines and call-to-action buttons) should avoid shouty ALL-CAPS wording, except for true acronyms (e.g., USA, EU, FAQ). Consider this check FAILED if you see marketing or CTA words longer than 3 letters written in full capitals (for example: "NOW", "FREE", "SALE", "LIMITED TIME ONLY") in buttons, banners, or promotional copy. Consider this check PASSED if CTAs use sentence case or title case (for example: "Shop now", "Find a location", "Claim rewards"), and all-caps is reserved only for genuine acronyms.

Active Created: Feb 18, 2026 Updated: Mar 16, 2026 Source: Manual

#### Modern Classic Duality

All brand expressions must balance 'Classic Artisan' (quality, tradition, elegance) with 'Modern Innovator' (playfulness, convenience, accessibility). Messaging and visuals should reflect both premium craftsmanship and modern lifestyle. This guidance involves no substitution measures and considers it as not applicable to short functional CTAs like phrases such as "Shop Now" or "Add to Cart".

### Fréscopa Coffee brand guidelines in Governance Context

7. Optionally add your own additional guidelines.

## Exercise 1

## Leverage AI Assistant to Display Brand Guidelines

Use the AI Assistant to surface the brand guidelines configured in the Governance Context.

- Open <https://experience.adobe.com/#/@aemsitestrial/experiencemanager/>
- Click **AI Assistant** in the left navigation.

AEM homepage — AI Assistant in left navigation

- Enter the following prompt:

**Prompt**

Show me my brand guidelines

*Entering the brand guidelines prompt*

The Governance Agent will retrieve and display all brand guidelines.

*AI Assistant displaying brand guidelines*

## Exercise 2

## Update Content on a Page

Update text content on your Fréscopa site using the AI Assistant.

11. Open your Fréscopa site at <https://main--{siteName}--aemsitestrial.aem.live> (replace {siteName} with the name from your welcome email).

[aemsitestrial.aem.live](https://main--{siteName}--aemsitestrial.aem.live)

- **Site Live URL:** <https://main--creativerhino05647--aemsitestrial.aem.live>

*Your site URL from the welcome email*

*Fréscopa homepage showing the original headline*

12. Open AI Assistant and enter the first prompt:

### Prompt

On <https://main--{siteName}--aemsitestrial.aem.live/> Update "Your perfect coffee is four questions away!" to "Your coffee, your way!"

On <https://main--creativerhino05647--aemsite.aem.live/> Update "Your perfect coffee is four questions away!" to "Your coffee, your way!"

Reasoning complete

- ✦ The user is asking to update the text on a specific AEM page, which is supported by the content update capabilities.
- ✦ Analyzing AEM Experience Production data for "On <https://main--creativerhino05647--aemsite.aem.live/> update "Your perfect coffee is four questions away!" to "Your coffee, your way!"

Here's what I'll do on <https://main--creativerhino05647--aemsite.aem.live/>:

- Replace the headline 'Your perfect coffee is four questions away!' with 'Your coffee, your way!'

⚠ BRAND: The replacement headline 'Your coffee, your way!' is off-brand because it is a generic slogan lacking sensory, evocative, or premium language and does not balance modern and classic brand attributes.

Look good? Say "generate" to proceed, or tell me what to change.

Related Suggestions

↳ View brand guidelines

↳ Generate the page

*Entering the update prompt in AI Assistant*

13. The phrase "Your coffee, your way!" is not on-brand. Enter the second prompt to correct it:

🗨 Prompt

Use "Crafted to Your Taste, Perfected by Precision." instead of "your coffee your way!"

use "Crafted to Your Taste, Perfected by Precision." instead of "your coffee your way!"

> Reasoning complete

Here's what I'll do on <https://main--creativerhino05647--aemsite.aem.live/>:

- Replace the headline 'Your perfect coffee is four questions away!' with 'Crafted to Your Taste, Perfected by Precision.'

⚠ BRAND: Content meets brand guidelines and any generation will leverage your brand guidelines.

Look good? Say "generate" to proceed, or tell me what to change.

Related Suggestions

↳ Generate the page

*Second prompt — on-brand correction*

*Governance Agent confirms the new headline is brand-compliant*

14. Select **Generate the page** and click the **blue Send icon** to apply the updates.

*Preview URL with updated changes*

15. Review the changes and select **Accept changes as draft**.

Next steps: You may want to manually publish the page to make it visible to end users.

Accepting changes as draft

16. Click **Publish Page** (or use Quick Publish from the Sites admin).

*Publishing the updated page*

### Exercise 3

## Change a Webpage Using an Annotated Visual

Drive content updates by attaching an annotated PDF to the AI Assistant.

17. In the GitHub lab folder <https://github.com/guptapawan86/aem-nz-skill-up/lab-session>, download **1-Update-FrescopaCoffeeSustainability-V1.pdf** and review the annotated changes.

GitHub lab folder with exercise files

*Submitting the prompt with the attached PDF*

23. Click the **blue icon** to submit. The agent will create a plan.

Attached file

1-Update-FrescopaCoffeeSustainability-V1.pdf

Reasoning complete

- ☆ The user is asking to update the sustainability page using the attached PDF as a reference for the changes.
- ✦ Analyzing AEM Experience Production data for "Update the content of the sustainability page at `https://main--creativerhino05647--aemstestrial.aem.live/sustainability` based on the attached file 1-Update-FrescopaCoffeeSustainability-V1.pdf."

Here's what I'll do on <https://main--creativerhino05647--aemstestrial.aem.live/sustainability>:

- Replace the headline 'Frescopa & Sustainability' with 'Taste the difference of a truly responsible cup'.
- Update the text 'Our sustainability focus covers these core areas' to be more engaging.

⚠ BRAND: The replacement headline 'Taste the difference of a truly responsible cup' is off-brand because it is generic, lacks evocative naming, sensory description, and does not reflect the required duality of 'Classic Artisan' and 'Modern Innovator' brand pillars.

Look good? Say "generate" to proceed, or tell me what to change.

### ✓ What You Achieved

- ✓ Updated a page using an annotated PDF
- ✓ Accepted the changes and updated the original page

## Exercise 4

## Generate a New Page Based on a Brief and Template

Generate a brand-new web page by providing a content brief and selecting an AEM template.

27. In the lab folder, download and review **3-FrescopaCoffee-AprilBlog.docx** — the brief that guides the agent.

- ☐ The brief doesn't need a specific structure. Items that help agents produce high-quality output include: goals, audience, and topics.

28. In AI Assistant, select **New conversation**.

29. Click **+** and attach **3-FrescopaCoffee-AprilBlog.docx**.

30. Enter the following prompt:

### Prompt

Create a new page based on the attached brief at `https://main--{siteName}--aemstestrial.aem.live/coffee-bean-types`

## Welcome, Pawan

3-FrescopaCoffee-AprilBlog.docx x

Create a new page based on the attached brief at <https://main--creativerhino05647--aemstestrial.aem.live/coffee-bean-types>

> Reasoning complete

Please choose a template for the new page:

- Blog - Step by Step
- Blog - Generic

Related Suggestions

↳ Blog - Step by Step

↳ Blog - Generic

Selecting the Blog – Step by Step template

32. Review the agent's plan and select **Proceed**, then submit.

> Reasoning complete

Here's what I understood from your brief:

**New page:** <https://main--creativerhino05647--aemsitestrial.aem.live/coffee-bean-types> **Template:** Blog - Step by Step

**Page content:**

**Hero section** — Compelling headline using the primary keyword and a brief introduction positioning the brand as a specialty coffee authority.

**Comprehensive guide content** — Detailed, pillar-style article (1,500–1,800 words) covering Arabica vs Robusta, how origin affects taste, bean types for different brewing methods, and how to choose beans for personal preference, using clear H2/H3 structure, short paragraphs, and bullet lists.

**Internal linking and CTAs** — Embedded calls to action and internal links to product collection pages (by roast, origin, or bean type) to drive traffic and support conversions.

**SEO optimization** — Meta title (≤60 characters), meta description (150–160 characters), H1 with primary keyword, keyword placement in first 100 words, and schema markup for Article.

**Tone and style** — Educational, approachable, and expert tone; content should simplify complex concepts and reinforce quality and craftsmanship.

\*Note: Content must be 1,500–1,800 words, educational but approachable, and optimized for SEO.

Any generation will leverage your brand guidelines.\*

Say "proceed" to continue, or describe any changes.

[Edit page in AEM](#)

If you want to make more changes, describe them.

## Explore Coffee Bean Types, Origins, and Flavor Profiles

### Arabica vs Robusta

**Quality vs Strength: The Classic Coffee Rivalry**

Arabica and Robusta are the two main types of coffee beans. Understanding their flavor, caffeine, and texture helps you choose the best coffee beans for your daily ritual.

**Flavor and aroma**

Arabica is smooth, sweet, and often fruity or floral. Robusta is stronger, earthier, and more bitter with heavy body and extra caffeine.

**Best uses**

Choose Arabica for drip or pour-over clarity. Pick blends with some Robusta for espresso shots that need punch and thick crema.

Generated page preview — content created from the brief

| ✔ What You Achieved                                       |
|-----------------------------------------------------------|
| ✔ Submitted a prompt and brief to generate a new web page |
| ✔ Selected an AEM template to define the page layout      |
| ✔ Used brand guidelines to ensure brand compliance        |
| ✔ Viewed the newly generated page                         |

## Exercise 5 Update Image Placeholders

Replace image placeholders on the page generated in Exercise 4 using the Discovery Agent.

33. Select the first image placeholder on the generated page.

Image placeholder selected on the generated page

34. Click **AI Assistant** at the top of the page.

AI Assistant button at the top of Universal Editor

35. Enter the following prompt:

**Prompt**  
Show me 5 approved assets with coffee beans and coffee cups

*Discovery Agent uses semantic search to find matching assets*

Asset results returned by the Discovery Agent

36. Choose an image from the results and apply it:

**Prompt**  
Update with image 1

Selecting image 1 from the discovery results

37. Select **Apply Changes** to see the update applied in real time.

*Image placeholder replaced with the selected on-brand asset*

38.Repeat for each remaining image placeholder.

### ✓ What You Achieved

- ✓ Updated copy using agents directly within Universal Editor
- ✓ Replaced image placeholders with on-brand assets using the Discovery Agent

## Exercise 6

## Content Optimisation — Social Media Formats

**Goal: Generate multiple social media renditions from a single asset using the AI Assistant.**

39. Run a discovery prompt to return at least three images from **/content/dam/skillup-nz/**.
40. Identify an image you would like to use for a social media campaign.
41. Prompt the agent to generate renditions for these formats:

| Platform    | Dimensions     | Format           |
|-------------|----------------|------------------|
| Instagram   | 1080 × 1920 px | Portrait / Story |
| Facebook    | 1200 × 630 px  | Landscape        |
| Twitter / X | 1200 × 675 px  | Landscape        |

42. Note how the agent is context-aware — you can say *"the third image"* without re-specifying the asset.
43. Expand the **Reasoning** section to see the Agent Orchestrator switch to the Content Optimisation Agent.
44. Review the smart crop links — these are live Dynamic Media URLs ready for use.

### Sample prompts:

- *"Generate Instagram 1080x1920, Facebook 1200x630, and Twitter 1200x675 formats for the second image"*
- *"Create social media crops for my jane-doe-hero asset"*

## Exercise 7

## AI Content Visibility Chrome Extension

Install the AI Content Visibility Checker extension to analyze your website's AI discoverability.

45. Install the Chrome extension:
  - [AI Content Visibility Checker](#)
46. Open your Fréscopa site and activate the extension.

AI Content Visibility Checker showing 80% content visibility score

## Exercise 8 Check Brand Visibility with LLMO

Use the LLMO tool to check how visible your brand is to AI language models.

47. Log in to one of the LLMO portals:

- <https://play.llmo.now/>
- <https://llmo.now/>

48. Search for your domain to check your brand's current AI visibility and discoverability.

- ☐ Your domain must already be onboarded for visibility data to appear.
- ☐
